This is a very classically designed book from the admirable Occasional Press. The images, often double-page spreads are bled to the edges, and the poems are separated out and given their own space. I happen to like the work of both poet and artist though I'm not sure that there is any substantial connection between the two (in relation to this book), other than the fact that they were both residents at Cill Rialaig. As an object this is a very attractive book though the differences between artist and poet seem to me to outweigh any contextual interpenetration. Worth buying however.
